**DIRECTIONS FOR USE**

**RESTRAINTS**

DO NOT apply to weeds or crop under stress due to severe frost, drought, water logging, low soil fertility, pre-emergent herbicides, insects or diseases.

DO NOT use boomless jets or misters.

DO NOT apply if rain is expected within a half-hour.

<td>Wild oats and Annual Ryegrass in mixed infestations</td>
<td></td>
<td>Growing actively at 2-4 leaf (pre-tillering)</td>
<td>NSW, VIC, TAS, SA only</td>
<td>380 g</td>
<td>Use where application is delayed. Do not apply to pre-tillered crops. Use of Magrify or Supercharge at 1 L per 100 L may improve weed control if soil is dry or if applying during August onwards.</td>
</tr>
<tr>
<td>Annual Phalaris (suppression only of Paradoxa grass, Lesser canary grass)</td>
<td></td>
<td>Growing actively at 2-4 leaf (pre-tillering)</td>
<td></td>
<td>380-500 g</td>
<td>Do not apply to pre-tillered crops. Use spray volumes to 70-100 L/ha may assist control. Tank mixes with the lower rate with listed broadleaved herbicides may reduce annual phalaris control.</td>
</tr>
</tbody>
</table>

* ALWAYS APPLY MAGNIFY OR SUPERCHARGE. THE NORMAL RATE IS 750 mL PER 100 L SPRAY SOLUTION.

INCREASE THE RATE TO 1 L PER 100 L UNDER DRYING CONDITIONS. ALWAYS USE 1 L PER 100 L FOR AERIAL APPLICATION.

NOT TO BE USED FOR ANY OTHER PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD:

DO NOT GRAZE OR CUT FOR STOCK FOOD FOR 14 DAYS AFTER APPLICATION.

**ACTIVE CONSTITUENT:** 400 g/kg TRLAKOXYDIM

**HERBICIDE**

**GROUP A** HERBICIDE

**HERBICIDE A**

**Tralkoxydim 400 WG**

**APVMA Approval No:** 65110/54629

**ACTIVE CONSTITUENT:** 400 g/kg TRLAKOXYDIM

**For the Control of Wild Oats and Annual Ryegrass and Suppression of Annual Phalaris in Wheat, Barley, Rye and Triticale.**

**IMPORTANT:** Read this leaflet before use.
Apparent Tralkoxydim 400 WG Herbicide is a member of the cyclohexanediones group of herbicides. Apparent Tralkoxydim 400 WG Herbicide has the inhibitors of acetyl CoA carboxylase mode of action.

Apparent Tralkoxydim 400 WG Herbicide is a Group A Herbicide. The hopper should be dry before adding Apparent Tralkoxydim 400 WG Herbicide slowly to the spray tank through the tank opening or through a hopper designed to handle granules. The hopper should be dry before adding Apparent Tralkoxydim 400 WG Herbicide granules.

- Do not premix Apparent Tralkoxydim 400 WG Herbicide.
- Add the total required amount of Apparent Tralkoxydim 400 WG Herbicide from all cartons first, prior to adding other herbicides or Magnify or Supercharge.
- Wait at least one minute after the last of Apparent Tralkoxydim 400 WG Herbicide has been added to the tank to allow complete dispersion of the granules.
- Add the recommended weedicide or insecticide next if tank mixing.
- Slowly add Magnify or Supercharge to the tank last, in at least 10 times its volume.
- If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

FIRST AID
- Harmful if swallowed. Will irritate the eyes. If the product in eyes, wash it out with water for at least 15 minutes. Wash hands after use. Do not wash face shield or goggles.
- Spraying instructions

SPRAYING EQUIPMENT

In aerial equipment, do not use floodjet nozzles, boomless jets or misters or controlled droplet application equipment. Nozzles should be positioned to enhance penetration of the crop and provide better coverage. Always ensure that agitation is continued until spraying is completed even if full mixing does not occur. For most herbicides, agitation is stopped for more than 5 minutes re-suspend the spray solution by running on full agitation until the settled particles are fully re-suspended, prior to spraying. The spray mixtures of Apparent Tralkoxydim 400 WG Herbicide (Tralkoxydim 400 WG Herbicide) or Supercharge may be left overnight without loss of efficacy provided the settled product is completely re-suspended by stirring and agitation prior to re-use.

AERIAL EQUIPMENT

Apply through boom or Micronair units in 20-30 litres of water per hectare. The use of the higher volume is preferred due to more reliable results. Droplet size should be 200-250 microns (SMV) and swath width should not be wider than recommended for type of plane and application unit. Weed control following aerial equipment may not be as good from ground application.

CROP SAFETY

Apparent Tralkoxydim 400 WG Herbicide is applied to stressed crops or with low vigor, weed control may be reduced. If crop plants have less than 2 true leaves (Z12), yellowing or growth retardation may occur. Crops normally recover without treatment if the stress is followed by stress or if crop plants have less than 2 true leaves. Weed control following aerial application may not be as good as from ground application.

PLANTBACK PERIODS

Do not plant rice, corn, or maize for a period of four weeks after application of Apparent Tralkoxydim 400 WG Herbicide. Allow at least 10 days between application of Apparent Tralkoxydim 400 WG Herbicide and planting of potatoes, onions, and garlic.

DO NOT mix with other broadleaved herbicides containing 2,4-D, MCPA amine, dicamba or metsulfuron-methyl.

Allow at least 14 days between application of Apparent Tralkoxydim 400 WG Herbicide and metsulfuron-methyl.

Apparent Tralkoxydim 400 WG Herbicide should be applied prior to the broadleafed herbicides.

INSECTICIDES

Apparent Tralkoxydim 400 WG Herbicide is compatible with the foliar applications of the insecticides: permethrin, cypermethrin, phosmet, lambda-cyhalothrin and dimethoate.

DO NOT apply under weather conditions that cause spray drift onto nearby susceptible plants/crops, cropping lands or pastures.

STORAGE AND DISPOSAL

Store in the closed original container in a dry cool-well-ventilated locked room or place away from children, animals, food, feedstuffs, seed and fertilizers. Do not store with other products.

Do not use from personal damage.

Single rinse before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. Puncture and burn empty bags in a local authorityapproved unit. If it is not available, bury the containers below 500 mm and mark the pit specifically marked and set up for this purpose clear of watersheds, desirable vegetation and tree roots in compliance with relevant Local, State or Territory government regulations. Do NOT burn empty containers or product.
